

BioNTech says thank you

Frickenhausen, January 13, 2021 – In its press release published on December 31, 2020, the immunotherapy company BioNTech, based in Mainz, Germany, thanks the laboratory products manufacturer Greiner Bio-One as one of its business partners for its support in the development of the first effective Covid-19 vaccine, which BioNTech recently launched and intends to make available worldwide as soon as possible.

As a systemically relevant company, Greiner Bio-One in Frickenhausen, Germany, manufactures laboratory products that play an important role in Sars-CoV-2 diagnostics as well as in vaccine research and production. Like many other pharmaceutical companies, BioNTech relies on Greiner Bio-One products for the development of a Covid-19 vaccine and uses, for example, its 15- and 50-ml tubes, serological pipettes, cryogenic tubes and microplates.

Heinz Schmid and Jakob Breuer, Managing Directors of Greiner Bio-One GmbH, pass on their thanks to their employees: "This once again underlines how important our products are in researching and combating the corona virus. We can be justifiably proud of the contribution we are making with our products to overcoming the crisis."

PRESS

Greiner Bio-One International GmbH

Greiner Bio-One specialises in the development, production and distribution of high-quality plastic laboratory products. The company is a technology partner for hospitals, laboratories, universities, research institutes, and the diagnostic, pharmaceutical and biotechnology industries. Greiner Bio-One is split into three divisions – Preanalytics, BioScience and Sterilisation. As an Original Equipment Manufacturer (OEM), Greiner Bio-One provides individual solutions in the area of custom-made design developments and production processes for the life sciences and medical sectors. In 2019, Greiner Bio-One International GmbH generated a turnover of 509 million euros and had over 2,300 employees, 28 subsidiaries and numerous distribution partners in over 100 countries. Greiner Bio-One is part of Greiner AG, which is based in Kremsmünster (Austria).

Greiner Bio-One BioScience Division

The BioScience division of Greiner Bio-One ranks among the leading providers of specialised products for the cultivation and analysis of cell and tissue cultures. Drawing on decades of experience with cryogenic sample storage, Greiner Bio-One also offers solutions for automated storage systems in biobanks. In addition, we continue to utilise our expertise in the development and production of microplates for high-throughput screening, thereby allowing extremely fast and efficient drug screening for both industrial and research applications. The entire development, manufacturing and sales operations are controlled from the German headquarters of the BioScience division in Frickenhausen.
